

# The Complete Phycox® Line of Nutritional Joint Supplements

**Phycox Soft Chews** - The original formula is recommended for active dogs and dogs of all ages who require a moderate level of joint support.

**Phycox MAX Soft Chews** - Recommended for sporting and working dogs and dogs of all ages who require a maximum level of joint support. Phycox MAX chews contain six additional active ingredients and 3X the phycocyanin as compared to Phycox original formula to aid in senior health and advanced joint support.

**Phycox HypoAllergenic Soft Chews** - Developed for dogs with food sensitivities or intolerances. Phycox HA chews use Hydrolyzed Vegetable Protein derived from soybeans, and do not contain beef, chicken, corn or wheat.

**Phycox HypoAllergenic MAX Soft Chews** - Phycox HA MAX chews contain the same Hydrolyzed Vegetable Protein as Phycox HA, in addition to six more ingredients and 3X the phycocyanin for maximum support of joint health.

**Phycox Small Bites and Granules** - Developed for dogs under 30 pounds or for dogs who may not be able to eat the larger Phycox Soft Chews.

## A Patented Joint Supplement Developed Specifically For Dogs

As dogs live longer, they have many of the same signs of aging their owners do — including joint discomfort. And many of the same supplement ingredients that pet owners use can be formulated to help their pets. That's why we specifically developed the family of high-quality Phycox soft chews formulations for dogs. Phycox combines phycocyanin, antioxidants, omega-3 fatty acids, and a blend of beneficial ingredients in a patented formula to support joint health.

## The Only Joint Supplement With Phycocyanin

Phycox provides a comprehensive blend of beneficial ingredients for joint health - phycocyanin, glucosamine, MSM, antioxidants, creatine and more. Phycocyanin is a natural antioxidant, derived from blue-green algae, that has powerful free radical scavenging properties which can support the body's normal defense against the harmful effects of free radicals that cause cellular damage and inflammation. (US Patent 7,025,965). And only Phycox has it.

## Dogs Love the Taste of Phycox Joint Supplements

Most dogs love the taste of Phycox soft chews and granules. In fact, we guarantee the palatability of our products. If your dog refuses to eat the supplement, just return the unused portion to your veterinarian for a full refund or replacement.

## The One Joint Supplement For All Four Legs

For years, veterinarians and pet owners have trusted the Phycox brand as an oral supplement that offers pet owners a clear option for the health of their dogs. Phycox is a complete formula that helps maintain healthy cartilage and joint mobility in dogs, young and old. As joint discomfort decreases, many dogs become more playful - you'll see the difference in your pet.
